CAREER OBJECTIVE

Microsoft Certified Security Operations Analyst with expertise in Microsoft Sentinel, Defender for Endpoint, Office 365, and Purview. Skilled in attack simulation and automation, aiming to enhance cybersecurity operations by reducing response times and improving threat detection.

EDUCATION

BSc. Information security and digital forensics

Coimbatore, TN | Jun 2023

KARUNYA UNIVERSITY

CGPA: 8.15

WORK EXPERIENCE

SKYSECURE | SOC Analyst L1

coimbatore, TN | Apr 2024 - present

- Monitored and Handled 100+ security incidents monthly in **Microsoft Sentinel**, providing remediation steps that reduced the resolution time by 25%.
- Developed a **playbook** using **Azure Logic Apps** for high-severity incident notifications, improving response efficiency.
- Developed use cases and custom analytical rules to enhance threat detection and response capabilities
- Conducted attack simulations in **Microsoft Defender for Office 365**, improving employee preparedness against phishing attacks.
- Examined quarantined emails to identify false positives or malicious content, ensuring secure delivery to user mailboxes with 98% accuracy
- Investigated suspicious activity and performed antivirus scans using **Microsoft Defender for Endpoint** to identify and resolve threats.
- Analyzed 100+ Microsoft Purview DLP alerts daily, fine-tuning policies to reduce false positives by 20%+ and reporting data exfiltration activities.

ZOHO | Security Engineer Intern

Chennai, TN | Jan 2023 - Mar 2023

- Performed white-box penetration testing on Java-based web applications, focusing on code analysis to identify and remediate XSS and SQL injection vulnerabilities.

PROJECTS

AZURE SENTINEL THREAT MONITORING

SeNTINEL, POWERSHELL, WORKBOOK, KQL, VM

- Configured Azure Sentinel with a honeypot virtual machine and developed a PowerShell script to parse Windows Event Logs, retrieving attacker geolocation using an IP Geolocation API and visualizing their locations on a world map in custom workbooks

LIMACHARLIE EDR AND SOAR

LIMACHARLIE EDR, TINES, WINDOWS SERVER , LAZAGNE

- Set up a Windows Server virtual machine with LimaCharlie EDR, created custom detection rules for the LaZagne password-cracking tool, automated alerts via Tines webhooks, and developed a SOAR playbook using LimaCharlie APIs to enable automatic machine isolation.

CERTIFICATION

Microsoft Certified: Security Operations Analyst Associate(SC-200)

SKILLS

Technical Skills: Threat Hunting, Email Analysis, Malware Analysis, Digital Forensics, Networking, Linux

Security Tools: SIEM, EDR, XDR, DLP

Query Language: KQL
